

Candy Airplanes

You will need:

- 1 stick of chewing gum (*optional decorative wrapper*)
- 1 roll of Smarties
- 2 Lifesavers
- 1 medium-sized rubber band

1. (optional) Wrap the stick of gum with decorative wrapper using a glue stick or tape.
2. Remove Lifesavers from wrappers. Slide rubber band through the center hole of both Lifesavers leaving the ends sticking out on both sides.
3. Holding Lifesavers underneath the stick of gum, bring each end of the rubber band up and over the end of the gum one at a time so that the Lifesavers are attached underneath.
4. Slide the roll of Smarties between the Lifesavers but above the rubber band so that the rubber band holds the Smartie in place under the wings.
5. Take your candy "airplane" out for a test flight!
